

# Settels Savenije van Amelsvoort

Settels Savenije is a group of companies where high-level technology is combined with a passion for people. We invent, design, manufacture, assemble and test high tech equipment, products and tools. We provide a challenging and dynamic working environment where theory and practice are combined in a splendid location @ TAQ – Strijp T Eindhoven.

## Development & Engineering

Our research, development and engineering activities are covered by 5 expertise groups. Our groups cooperate closely and there are regular interchanges between projects. Our company is growing fast. If you are a talented technology professional, why don't you join the team that fits your personal interests and talents best?

## Operations & Precision Parts

Our development activities are closely integrated with manufacturing, testing and assembly. Our supply chain team takes care of partnerships with strategic suppliers. Recently we installed a top of the bill cleanroom. As a solution provider, we guarantee success in delivering complex and technologically advanced systems.

## Precision Parts

In our own precision parts factory, complicated high accuracy metal parts & modules are being manufactured. Production concentrates on cutting technology, from proto up to high-volume production. Automated machinery guarantees short lead times and cost-efficient production.
